Voice Cloning TTS with Chatterbox

An AI-driven system to clean, process, and clone voices from custom audio + YouTube transcripts.

CUDA available: True

Using GPU: NVIDIA GeForce GTX 1650

Audio Fine-Tuning Preferences (before generation)

Choose tuning method:

- ☒ Preset Styles
☐ Manual Tuning

Select a preset style:

Older Deep Voice (stylized)

Selected tuning: {'pitch': -6, 'speed': 0.95, 'gain': 2, 'bass': 5, 'treble': -3.5, 'reverb': 0.18}

Generate Cloned Voice

Step 1: Audio Cleaning (Agent A1)

Cleaning audio using Agent A1...

0:00 / 0:10

✓ Audio cleaned successfully!

Step 2: Applying Fine-Tuning

0:10 / 0:10

✓ Applied tuning: {'pitch': -6, 'speed': 0.95, 'gain': 2, 'bass': 5, 'treble': -3.5, 'reverb': 0.18}

Step 3: YouTube Transcript Processing (Agent A2)

Extracting transcript...

Raw Transcript

i don't know what that dream is that you
have
i don't care how disappointing it might
have been
as you've been working toward that dream
that that dream that you're holding in
your mind

Polishing with Gemini...

Polished Transcript

I don't know what that dream is that you have. I don't care how
disappointing it might have been as you've been working
toward it—that dream you're holding in your mind—that it's
possible. [Music] You.

Step 4: Voice Cloning (Agent A3)

Generating cloned voice...

0:12 / 0:12

Cloned voice generation complete!
